

COVID 19 SCREENING TOOL FOR STUDENTS, STAFF AND VISITORS

ROUND TOP-CARMINE ISD

| Have you or your child had any of the following symptoms in the last 14 days?  | Yes | No |
|--|-----|----|
| Persistent Cough   |     |    |
| Shortness of Breath or Difficulty Breathing  |     |    |
| Fever of 100 or higher   |     |    |
| Feeling Feverish   |     |    |
| Chills, Shaking (with or without fever)  |     |    |
| Fatigue  |     |    |
| Muscle pain or aches   |     |    |
| Sore throat  |     |    |
| Congestion   |     |    |
| Runny Nose   |     |    |
| Loss of Sense of Smell or Taste  |     |    |
| Nausea   |     |    |
| Vomiting   |     |    |
| Diarrhea   |     |    |
| Headache   |     |    |
| Have you or your child had a known exposure to a Covid Positive individual within the last 14 days? (within 6 feet of the positive individual for at least 15 minutes without masks) |     |    |
| Has anyone in the household been diagnosed with Covid in the past 14 days?   |     |    |

**Individuals Confirmed or Suspected with COVID-19**

1. Any individuals who **themselves** either: (a) are lab-confirmed to have COVID-19; or (b) experience the symptoms of COVID-19 (listed below) must stay at home throughout the infection period, and cannot return to campus until the school system screens the individual to determine any of the below conditions for campus re-entry have been met:

- In the case of an individual who was diagnosed with COVID-19, the individual may return to school when all three of the following criteria are met:
  - i. at least one day (24 hours) has passed since recovery (resolution of fever without the use of fever-reducing medications);
  - ii. the individual has improvement in symptoms (e.g., cough, shortness of breath); and
  - iii. at least ten days have passed since symptoms first appeared, and
- In the case of an individual who has symptoms that could be COVID-19 and who is not evaluated by a medical professional or tested for COVID-19, such individual is assumed to have COVID-19, and the individual may not return to the campus until the individual has completed the same three-step set of criteria listed above.

- If the individual has symptoms that could be COVID-19 and wants to return to school before completing the above stay at home period, the individual must either
  - (a) obtain a medical professional's note clearing the individual for return based on an alternative diagnosis or
  - (b) obtain an acute infection test (at a physician's office, approved testing location, or other site) that comes back negative for COVID-19.

2. Effective December 2, 2020, school systems may apply any of the following stay-at-home periods to those individuals who are identified as close contacts. Specifically, the stay-at-home period can be:

- 10 days after the last close contact, as long as they continue to monitor themselves daily for symptoms and take appropriate precautions through day 14
- 7 days after the last close contact, after receiving a negative test result (administered at least 5 days after the last close contact), as long as they continue to monitor themselves daily for symptoms and take appropriate precautions through day 14 *(Round Top-Carmine is able to perform free COVID-19 testing for district students and staff. Please see the website for more information on testing and the permission form.)*

However, anyone who has had close contact with someone with COVID-19 and who:

- developed COVID-19 illness within the previous 3 months **and**
- has recovered **and**
- remains without COVID-19 symptoms (for example, cough, shortness of breath) **does not** need to stay home."

\*For COVID-19, a *close contact* is defined as any individual who was within 6 feet of an infected person for at least 15 accumulated minutes starting from 2 days before illness onset (or, for asymptomatic patients, 2 days prior to positive specimen collection) until the time the patient is isolated.
